RAWS BY REVILENISMA TRANSLATION BY BROLEN CLEANING AND EDITING BY REVILENISMA QUALITY CHECK BY MORTEN AND BADPHISH

Brain: Swear to God Snake, I thought you were dead... Snake Plissken: Yeah, you and everybody else!

We enter the 5th year of GWR now, and I'm close to retire... Like so many other groups in the last months we thought about throwing the towel regarding MangaFox business of making money through their online reader sites with free scanlations.

I invested my private money into my hobby to buy volumes, scan them myself and pay translations if I couldn't get them for free. The outlook of continuing this in regards of online readers making profit of this disgusts me.

Also that there's no clear support from readers anymore, most of them became merely consumers of the online readers. The times of the old scanlation community holding together are at ends. That's why we plan to close the curtain soon.

Retirement or...

So our next release might be the last. With an exeption though...

Recruitment

If we can get enough new members to support our group then I might continue and help further. We need 4-6 typesetters, 1-2 japanese-english translators and 2-3 french translators to finish off our most important projects.

Also, I will ask for donations now continuing a certain number of projects. I'm not willing to put my own money into this anymore. The projects will be Moyashimon, Desert Punk, Red Eyes and Kerberos Panzer Con.

There will be a number of new projects that you can support with your donations as well, an announcement will be made.

NO WATTER
